Company Overview

The company was established in the pine forest of Pyeongchang in December, 2000 following direct experience of the efficacy and healing power of pine needles and pine wood fire. In order to inform people of the cancer healing experience and the healing effects of pine needles and pinewood fire, a pine needle experience room was opened under the name, Suga. Sugasol sells skin care, oral care, body care, and home kit foods containing more than 50% natural raw pine needles based on the outstanding efficacy of pine needles recorded in such oriental medical books as Donguibogam and Ben Cao Gang Mu. We will do our best for the health and happiness of our customers using the rich nutrients and natural ingredients of pine needles.

History
