Company Overview

H ROBOTICS INC. is a company that develops products and services which can provide meaningful experiential value to customers based on robotics technology.

“rebleSS” is a product which takes the first step in meaningful experience and is a smart remote rehabilitation solution that combines cutting edge hardware and software technology. In recognition of its technology and creativity, we have completed Seed investment from POSTECH Holdings in 2019 and Pre-A Round investment from three investment companies under DSC investment leading in 2020. In addition to this, we are carrying out several national projects based on robot technology, and are continuously developing technology and popularizing rehabilitation equipment.
