Company Overview

Seojin Food engaged in research into salted sea foods even before the company was founded. Those results were reflected in the products it made upon entering production. For some 20 years, we have been making all our products by hand, consistently delivering our hometown taste to local companies in the metropolitan area or discount stores in large supermarkets. We sell products under the brand names “Haedamchan” and “Haedamteo” in online shopping malls, and also deliver about 1 ton of salted pollack roe per month to franchise companies with national chains. In addition, we have stores such as the Wonju Horticultural Agricultural Cooperative Hanaro Club store and innovation store.

History

- 2015. 12 Established Seojin Food Company
