### Company Overview

Hwacheon gasiogalpi Farm grows organically pure domestic Siberian ginseng. From 1999 to now, we have been researching and testing for many customers. We are directly growing and producing products using materials such as adenophora triphylla and blackcurrants along with Siberian ginseng, a major product, and we were selected as the 6th Rural Convergence Industry Certification Company in Gangwon-do for being recognized for its contribution to growing and processing reliable crops. Above all, we aim to meet our customers with honest, high-quality products
