Company Overview

Since established as a welder specialty company in 2000, Postech has focused on developing new equipment, has rapidly grown, and has today reformed into a general industrial equipment company that also deals with relevant training. In order to advance welding and industrial equipment technologies that form the basis of national industries such as shipbuilding and heavy industries, electronics, automobiles and heavy equipment, construction, schools and research institutes and to materialize stable products, we present advanced technologies through continuous research and systematic accumulation of technologies.

Currently, we are developing monitoring systems to provide customized services by calculating information about welders and batteries, and we are working to commercialize them.
